REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: This application teaches an electroless gold plating liquid comprising a non-cyanide gold salt as a gold salt, an alkali metal salt or an ammonium salt of sulfurous acid and thiosulfuric acid as a complexing agent for gold, a hydroxyalkylsulfonic acid or a salt thereof of the formula

wherein R represents H, a carboxyl group, or any of a phenyl group, a tolyl group, a naphthyl group, a saturated or unsaturated alkyl group, an acetyl group, an acetyl group, a pyridyl group and a furyl group which may have a substitutional group; X represents H, Na, K and NH₄ and n is an integer between 0 and 4. The closest prior art of record is WO 2004/111287 in view of U.S. Patent No. 5,470,381, issued to Kato et al.; however, applicants have filed a certified English translation of their foreign priority, which entitles them to a date of April 5, 2004, which is earlier than the effective filing date of the above WO reference. Accordingly, the 103(a) rejection over WO 2004/111287 in view of Kato et al. has been overcome and the application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
